

# Colour Guide

Art.: 95.1450.9999

The Colour Guide is part of the Innotec Stone Chip Repair System and the Innotec Stone Chip Repair System - VW (VAS 6083A). It is a colour range that shows the colours used in the system. A viewing window in the sheet makes it easier to compare it against the colour of the vehicle. The colour number and colour description are printed on the back, making it easy to pick the corresponding colour from the system.
