

Repaplast Scratch Repair System

Art.: 10.1915.9999

Set

The Repaplast Scratch Repair System is a unique set of products especially developed to repair surface damage to textured plastic parts in a safe and professional manner.

This system is extremely well suited to repairing many common, textured vehicle parts. The parts most sensitive to damage are the mirrors, the bumper parts and the mudguard parts.

In most cases the Repaplast Scratch Repair System ensures that these plastic parts, which are often expensive, do not have to be removed and replaced. With a very small investment in time the damaged part can be returned to its original condition.

The Repaplast Scratch Repair System comes complete in a durable case, to keep everything you need to hand during the repair.

[Repaplast Colour Finish Better Care](#) is the ultimate plastic lacquer for finishing repairs carried out with the Repaplast Scratch Repair System. The product is available in the most common original OEM colours. This means that the product is also extremely well suited to restoring weathered plastic parts to their original state with a minimum of effort.

- System for repairing surface damage to textured plastic parts.
- Expensive plastic parts do not have to be replaced.
- Very small investment in materials and time.
- The plastic lacquer is extremely well suited to weathered plastics.
