

## Aero-Bond

Art.: 07.0628.6100

Bottle 15 ml

Aero-Bond is part of the [Aero-Bond Set](#), this is a high-quality anaerobic glue system, which has been specially developed for gluing metal to glass.

|                              |   |
|------------------------------|---|
| Base:                        | Modified acryl  |
| Density:                     | 1070 kg/m <sup>3</sup>  |
| Consistency:                 | Pasty   |
| Viscosity:                   | 60.000 mPa.s  |
| Temperature resistance:      | -40°C to +149°C   |
| UV resistance:               | Good  |
| Flexibility:                 | Good  |
| Shrinkage:                   | 5%  |
| Application conditions:      | +15°C to +40°C  |
| Type of surface:             | Glass, ceramic layers, metal and aluminium  |
| Surface preparation:         | The surface must be clean, dry and free of grease. Clean the surface with Innotec <a href="#">Multisol</a> or Innotec <a href="#">Seal and Bond Remover</a> .   |
| Application method:          | Remove residues of old glue. Locate area and apply <a href="#">Aero-Primer</a> to the window using the brush in the cap. Leave a few seconds to evaporate. If necessary, smooth off the edges of the mirror base. Then, depending on the size of the overlap, apply the correct amount of Aero-Bond to the middle of the mirror base. Position the mirror base and press lightly for 20 seconds. To maintain a sufficiently thick layer of glue and avoid glass to metal contact, do not press too hard when gluing. Leave to dry for 5 minutes. Mount the fixing and finish assembly. If necessary, clean with <a href="#">Foam Glass Clean Plus</a> . |
| Recommended layer thickness: | A thin, even layer  |
| Cleaning of materials used:  | With Innotec <a href="#">Multisol</a>   |
| Cleaning of hands:           | With Innotec <a href="#">Safe Hand Clean Plus</a> and water   |
| Shelf life:                  | 12 months in original, unopened packaging   |
| Storage conditions:          | Store cool and dry  |
| Type of batchcode:           | F   |

This technical info sheet replaces all previous versions.

All information is supplied without obligation and based on our knowledge and experience with the product under normal conditions. In practice, the information supplied can in no way replace the tests that need to be performed before first use of the product. Only prior testing of the product can prove whether the product is indeed suitable for the intended application (or not). Thus, we cannot accept any responsibility in case our products are not used in compliance with the advices given.

If the product should not meet the quality requirements, we will only reimburse up to a maximum of the purchase price of the product. We accept no responsibility whatsoever and shall under no circumstances be liable for damage or consequential loss arising from the use of the product.

For information concerning safe use and storage, please refer to the safety data sheet of the product concerned.
