

Airco Clean Control

Art.: 04.0159.9999
Aerosol can 250 ml

Airco Clean Control is a unique professional cleaner for air conditioning systems. Airco Clean Control removes dirt at the source: the evaporator. In addition to cleaning the system perfectly the product prevents new dirt from easily adhering to the surface.

Base:	Active foam made from surface active substances
Density:	$\pm 957 \text{ kg/m}^3$
Consistency:	White foam that becomes a milky liquid after a few minutes
Solvents:	Water, biodegradable chemical solvents and esters
Flash point:	$< 0^\circ\text{C}$
Foam stability:	Very good
Application conditions:	$+10^\circ\text{C}$ to $+30^\circ\text{C}$
Type of surface:	Air conditioning evaporators
Application method:	The person who is going to carry out the treatment should have sufficient knowledge of the air conditioning system to be cleaned. Switch off the air conditioning system a few minutes before the treatment, this to make sure that the evaporator is not cold or moist anymore. For optimum cleaning it is important to apply the foam as close as possible to the evaporator. This can be done by removing some components (ventilation resistor, interior filter, ventilation motor, etc.) so that the spray nozzle at the end of the long tube can get close to or against the evaporator. In some cases it is also possible to clean the evaporator through the condensation water exhaust. If necessary, remove components that might be damaged during the treatment. When the design of the system requires it, the method of use may be varied to achieve the greatest cleaning results. Depending on the size of the system to be treated, use a maximum of 1 aerosol can per system. Allow at least 15 minutes for the product to take effect, then switch the fan at slow speed for 5 minutes. Now the air-conditioning system is clean and functional. For best results, refrain from using the air-conditioning for a few hours.
Cleaning of materials used:	With water
Cleaning of hands:	With Innotec Safe Hand Clean Plus and water
Shelf life:	2 years in original, unopened packaging
Storage conditions:	Store cool and dry
Type of batchcode:	F
Other details:	The propellant in the foam is flammable. Therefore ventilate well before turning on the system!
EAN Code:	5400563018521

This technical info sheet replaces all previous versions.

All information is supplied without obligation and based on our knowledge and experience with the product under normal conditions. In practice, the information supplied can in no way replace the tests that need to be performed before first use of the product. Only prior testing of the product can prove whether the product is indeed suitable for the intended application (or not). Thus, we cannot accept any responsibility in case our products are not used in compliance with the advices given.

If the product should not meet the quality requirements, we will only reimburse up to a maximum of the purchase price of the product. We accept no responsibility whatsoever and shall under no circumstances be liable for damage or consequential loss arising from the use of the product.

For information concerning safe use and storage, please refer to the safety data sheet of the product concerned.
