

Velours Repair System

Art.: 10.1460.9999

Set

The Velours Repair System is a set of products specially developed to repair damage to textile upholstery in a very easy and professional manner. Damage to textile upholstery is often caused by a burning cigarette or hot ash from a cigarette. Of course, when a person smokes there is a higher risk that this will cause damage to the upholstery, the result being a burn hole that spoils the look of the upholstery.

In many cases the Velours Repair System can be used to prevent the upholstery from being replaced. With a very small investment in time and materials the damaged fabric can be returned to perfect condition.

The Velours Repair System comes complete in a durable plastic case. The system is very organized and completely autonomous; there is no need for energy from an external source.

- Professional system for repairing damage to textile upholstery.
- Expensive parts do not have to be replaced.
- Very small investment in materials and time.
- Autonomous system.
